## Simply brilliant: The multifunctional space saver.

Minimum space, maximum performance: The four A4 multifunctional systems bring top performance to the smallest rooms. Whether on reception, in a home office, on a hospital ward, or as an extension of a main multifunctional system, you can always rely on productivity for printing, copying, scanning and faxing – even if you're short on space. You'll see: Space is not an issue when it comes to performance and versatility.

### Your benefits:

**Practical features:** Print directly from a USB stick or scan your data directly to your storage medium, reliably and with ease. Simply save recurring complex tasks including mailing lists as programs that can be called up at any time. The 'ID card copy' function is particularly practical, allowing you to copy A5 or even smaller double-sided originals onto one single page. It's all at the touch of a button!

**Flexibility bonus:** You can take full advantage of a productive printing speed of 30 or 35 A4 pages per minute without having to constantly refill the paper feed thanks to a max paper capacity of 800 sheets. Make savings with the integrated duplex unit for double-sided printing, right there for when you need it. Do you use small-format forms such as prescriptions? This is no problem at all. Formats from A6 upwards are automatically processed from the standard cassette or the multi-bypass.

**Integrated cost management:** Allocate jobs to individual projects or departments to ensure transparency and efficiency. Save money thanks to the particularly long-lasting consumables and low energy consumption: That's good for the environment, too!

The space-saving, pleasing design integrates seamlessly into any office environment and the printing function is compatible with almost any network.
